

Wonder Guards Sizing Charts

Use the guides below to best determine the proper size of guard you will need. This chart and instructions are just suggestions on the proper fit. **We strongly suggest you order a variety pack or single guard for your first order to determine the best size.**

Instructions: Use the rectangles below to determine the best fit. Keep in mind the guards will stretch into the next size up.

Place your finger or toe in the middle of the rectangles. For general purpose use you want your finger or toe to be just slightly wider than the width of the rectangle. For very sensitive areas you want the outer edges of the rectangle to be just visible along the sides of your finger or toe. For more active uses you want the outer edge of the rectangle to be around the width of the finger or toe nail you are measuring.

Ring Guard Sizing Chart

Please keep in mind Padded Ring Guards will have less stretch than other Wonder Guards products. When choosing a correct size the outer edges of the rectangles should match as close to the outer edge of your finger as possible.

Instructions: Place your wrist on the rectangles below. For a proper size the outside lines of the rectangle should be just inside the outer edge of your wrist. **Keep in mind your wrist is usually not perfectly round so measuring in both directions can help with a better fit.**

A large horizontal rectangle with a thick black border, intended for a large wrist.

Large

A medium-sized horizontal rectangle with a thick black border, intended for a medium wrist.

Medium

A small horizontal rectangle with a thick black border, intended for a small wrist.
